MBP 150/50

MBP 150/50

The MBP 150/50 Combination Emergency Safety Shower / Body Shower or Drench Shower / Deluge Shower including Eyebath / Face Wash Fountain suitable for indoor use and floor mounting. This product is entirely made of GRP and has an external 63 mm / internal 53 mm standpipe with a 1 ¼ " BSP external water connection and floor mounting plate and is combined with the MB 50 Eyebath / Face Wash Fountain which has an "unbreakable" ABS bowl and hinged lid (including sign). The lid is at the same time the operation of the Eyebath (pull forwards down and the water starts running). When the lid is pushed back and closed the eyebath stops automatically. Because of this hinged lid the Eyebath remains clean and hygienic. A drain is present on the collection tray of the eye shower. Also with the eye shower all parts (including valves, perlators, drainage, etc.) are made of plastic.

The Eyebath is equipped with diffusers (optional supplemented with black rubber Eye cups). These diffusers give a gentle aerated soft spray pattern which feels pleasant for the eyes. A drain is present on the bowl of the Eyebath. Also a Flow regulator is present on the unit in order to achieve a good spraying pattern. The Eyebath can have an option that the Eyebath drains empty after usage. Standard we have a bottom water inlet, but this can be changed to any position you require. Special Shower head (spray angle full cone 60° and gives rotation to the water) for an effective and efficient operation. The body shower is operated by means of a operation handle / lever halfway through the shower. On the other hand, one can optionally choose to provide the body shower with a pull handle. Minimum water pressure is 2 bar.

Click on the blue button to see a unique and detailed interactive 3d model of the MB 150 serie. With this you can have a 360 degrees view of the MB 150 series and the most relevant product options. [Other shower models](#) are also available in 3d view.
