

Product information

Breathable overall

Description

This material is breathable. It is antistatic, flame retardant and acid-resistant.

This suit ensures that perspiration moisture evaporates but at the same time prevents outside liquids and is acid resistant. It also has anti-static and flame-retardant properties.

One piece splash suit / Overall with overflap over the zipper is a chemical resistant one-piece work suit. Special attention is given to design features to offer maximum comfort and protection against harmful chemicals. The suits are user friendly to work with and designed for safe practical use.
