

Description

Boiler unit which is suitable for outdoor use (frost protection). The boiler can be combined with a full body shower and / or eyewash combined and are therefore equipped with pleasantly warm water. This results in a compact single unit. All internal connections are already made for you obviously and you only need one water connection and an electrical connection. All options are available, such as a mixing valve, etc.. We can also provide boilers for indoor installation. The water boiler is installed in a good and solid insulated cabin (which obviously is accessible) and against one or more walls may be the body shower and / or eyewash can be mounted. A great variety of options is possible. Specific demands are possible on your request.

Boiler 5000

boiler-5000-1.0
