

AC Battery Pack 230 V Case Model

Description

Power given to the magnet: 230V/50Hz AC

Dimensions without case model: 185x120x255mm

Weight: ca. 5 kg. (weighted without case model)

Gives approx. 4 till 5 hours power continuous in practise this means more power than one working day

Advantages of the battery pack

- Robust and handy battery pack
- Charging from 100 till 230V
- It is a AC power supply instead of a DC power supply (AC gives a skin effect what you need by magnetic inspection) DC is the same as a permanent magnet
- Gives enough power for inspection day
- Overload protection
- Gives an audio and a visual signal when battery is nearly empty

Besides the 230V version, the AC Battery Pack Case Model is also available in a [42V version](#) and a [110V version](#).
