

## MB 25 Mobile Eyebath

### Description

The MB 25 mobile Eyebath is easy to transport and easy to take with you. The system is under air pressure and guarantees a long-lasting good spraying pattern. The cylinder is made of Stainless Steel (including sign) and has a content of 10 liters. Due to different shower heads the duration can be 3 to 20 minutes (or longer).

This Eyebath has a single sprayer / diffuser with dust cover. Optional supplemented with black rubber Eye cups with hinged dust covers (including sign). This diffuser gives a gentle aerated soft spray pattern which feels pleasant for the eyes. The operation will be done by means of the hand control on the handheld Eyebath and main central handle on the cylinder which can be locked for easy operation. The system itself is easy to maintain and make ready for operational use (also air pressure).

Conditioning products are available in order to preserve the water and make it longer tenable. Additional a (frost free) cabinet can be delivered as well as an extra option in which the unit can be placed and is then suitable for outdoor use (frost protected). Also a trolley can be supplied as an extra option for easy transport. The system is also available for rental.
