

## MB 28 Mobile Safety Shower & Eyebath

### Description

The MB 28 mobile Combination Emergency Safety Shower / Body Shower or Drench Shower / Deluge Shower including Eyebath / Face Wash Fountain is easy to transport standard with Stainless Steel frame on Wheels. The system is under air pressure and guarantees a long-lasting good spraying pattern. The cylinder is made of Stainless Steel (including sign) and has a content of 150 liters.

The Body Shower has a special Shower head (spray angle 60° and gives rotation to the water) for an effective and efficient operation. Standard this unit has a MB 50 Eyebath with an “unbreakable” ABS bowl and hinged lid (including sign). The lid is at the same time the operation of the Eyebath (pull forward and the water starts running). When the lid is pushed back and closed the eyebath stops automatically. Because of this hinged lid the Eyebath remains clean and hygienic. The Eyebath is equipped with diffusers (optional supplemented with black rubber Eye cups). These diffusers give a gentle aerated soft spray pattern which feels pleasant for the eyes. A drain is present on the bowl. The standard spray time of the Eyebath is 12,5 minutes, due to different shower heads the duration can be made longer. The operation of the Body shower is done by means of the operation handle / lever. The standard spray time of the Body Shower is 4 minutes, due to different shower heads the duration can be made longer. This unit can also be equipped with the MB /20 /30 /75 /80 Eyebath. As an extra option an extra hand held Eyebath can be added to the unit with one or two sprayers / diffusers. The Eyebath has dust covers on the diffusers optional supplemented with black rubber Eye cups with hinged dust covers (including sign). The diffusers gives a gentle aerated soft spray pattern which feels pleasant for the eyes.

The system itself is easy to maintain and make ready for operational use (also air pressure). Conditioning products are available in order to preserve the water and make it longer tenable. On your request the unit can be equipped with a heater or heat tracing and insulation (frost protected). The system is also available for rental.
