

Description

The MB 30 S.DR. is a self draining Eyebath / Face Wash Fountain with an open Stainless Steel or Plastic bowl. Suitable for outdoor use (frost protected by means of self draining). Dust covers on the diffusers optional supplemented with black rubber Eye cups with hinged dust covers (including sign). These diffusers give a gentle aerated soft spray pattern which feels pleasant for the eyes. The operation will be done by means of Push Flag (push down for operation). The dust covers need to be placed back on the diffusers after usage. A Flow regulator is present on the unit in order to achieve a good spraying pattern. The self draining valve is located underground (below frost line). This valve should be placed in a drainbed so that the valve drains easily empty. As an option we can offer a concrete drain sump where this valve is placed in. For this unit there is no electrical connection required for frost protection. The self-draining valve can also be installed above ground level (MB30 S.DR.A). Minimum water pressure is 2 bar.

Specifications

- Water connection: 1 ¼" BSP Male or different on your request
- water pressure 2 bar
- water supply: 12 liter per minute
- manual operation
- flow regulator
- filters
- sign
- dimensions 380x400x2200 mm (WxDxH)
- meets the following standards: CE EN 15154 & ANSI Z 358.1

All product options

- footpedal
- proximity switch
- panel type foot control
- light
- sign
- hand shower
- heater
- black rubber eye cups with hinged dust covers (including sign)
- Y-strainer filter
- mixing valve
- drain put
- more options on request
