

Flawfinder

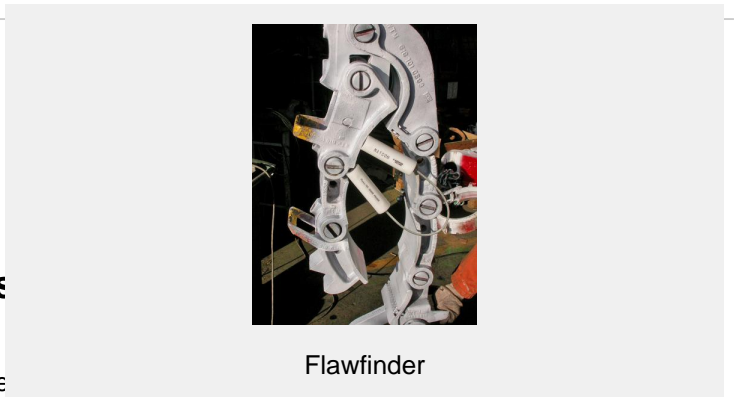

Description

This test instrument consists of 2 permanent magnets which are connected with a flexible cable. Uncomplicated, fast, and efficient testing becomes possible by this simple method. The magnetic field strength is sufficient to ensure the detection of surface discontinuities such as cracks and overlapping's.

Also suitable for underwater magnetic inspections.

Flawfinder

Flawfinder

- Height of the magnets: 140mm
- Length of junction cable: 420mm
- weight 2 Kg
- Lifting power is more than 18 kilo
