DOUBLE SYSTEM!

New Technology

Without any electrical supply keeping the water temperature at a desirable temperature level!

Using temperature difference during night time, but even when it doesn't cool off much during night time (global warming) our extra feature gives a cooling boost.

Will not go below the 25°C.

Self-supporting system.

We have this system for all our Tank Showers.

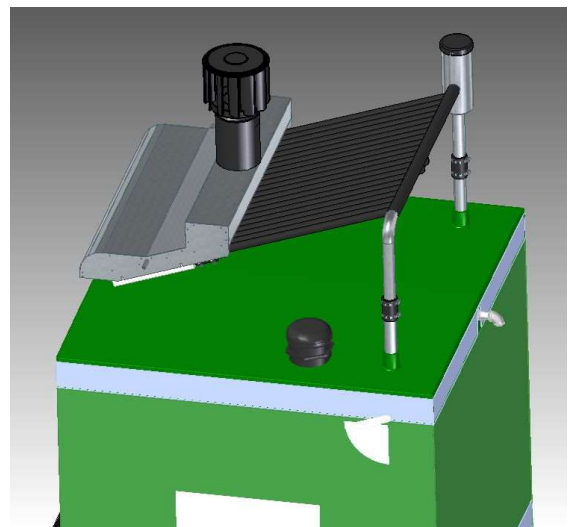

Our Tank Showers have a standard content of; 350 / 800 / 1000 / 1250 / 1500 / 1600 / 2200 liter.

The water tank of all our Tank Showers is very well insulated all around, so not only the four sides, but also top and bottom of the tank!

All options are available!

Anti-bacterial growth systems!

We do also have chillers as a possibility.
